Heart Attacks, Heart Disease, and Strokes can be expensive! In the United States, total costs exceed **\$351 billion**. Most people are surprised that their largest expenses during illnesses are often not their medical expenses — it's the **indirect costs** that their **health insurance doesn't cover**.

Two Types of Costs:

Direct Costs

- Doctor Bills
- Hospital Charges
- Medical Expenses

Indirect Costs

- Lost Income and Savings
- Living Expenses
- Insurance Limitations
- Travel for Best Treatment
- In-Home Care
- Child Care

While your expenses go up, your income and savings often go down, forcing you to rely on:

- Savings and Investments
- Selling Assets
- Retirement Funds
- College Funds
